

Java

```
class Solution {  
    public String clearDigits(String s) {  
  
    }  
}
```

JavaScript

```
/**  
 * @param {string} s  
 * @return {string}  
 */  
var clearDigits = function(s) {  
  
};
```

TypeScript

```
function clearDigits(s: string): string {  
  
};
```

C++

```
class Solution {  
public:
```

```
    string clearDigits(string s) {  
    }  
};  
-----
```

C#

```
public class Solution {  
    public string clearDigits(string s) {  
    }  
}
```

Kotlin

```
class Solution {  
    fun clearDigits(s: String): String {  
    }  
}
```

Go

```
func clearDigits(s string) string {  
  
}
```
